

Founded in 1978, to restore trust and confidence in the ship agency profession, Multiport is now the world's largest independent ship agency network with 10% of the worldwide agency business by port call.

Association members work in 110 countries covering some 2,200 ports.

Multiport provides agency cover for every type of cruise vessel and offers a first class service in all ports, whether turnaround or transit.

Our members have expertise, local knowledge and strong personal relationships which in turn are supported by an international network. Assured quality standards enable cruise lines to feel confident that individual interests are covered by stringent codes of conduct. By working in partnership, we tailor our services to meet your needs, either by country or region, with a single point of contact and IT solutions as required. This flexibility of approach brings peace of mind as owners and operators can be assured that their interests are being fully cared for.

Membership of Multiport is a calling card - a stamp of guaranteed professionalism. Multiport is a global group, only representing independent business partners who can demonstrate their integrity, quality and professionalism. By restricting membership to one per country and subjecting all potential and existing members to independent annual financial checks, Multiport has gained a reputation for selfdiscipline and quality.

Multiport believes that ship agency is first and foremost a local business which relies on home-grown expertise and is dedicated to providing excellence at local level together with excellence in hub management.
